1	Digital Wave after 2020	<p>2021 is here And it seemed like it took decades to reach here from 2020.</p> <p>The world underwent a huge "Digital Transformational Wave". Before we knew it, everything changed. The time wasn't about making predictions but adapting your business. And the world did just that... Behaviour patterns and the way of doing business was reconstructed by Technology.</p> <p>Here are listing 4 ways in which 2020 transformed businesses:</p> <p>① Shift in Standard Business Practices</p> <p>The pandemic forced businesses to forgo their old ways of doing things and restructure older models. And even while the world was locked down, businesses were running — online.</p> <p>② Accelerated Digital Transformation</p> <p>The digital wave that was expected in the next 5 years happened just in 5 months. Technology became a crucial aspect of company models — they innovated, attuned to the power of connectivity, & worked on strengthening their IT infrastructure.</p> <p>③ Embracing Remote Working</p> <p>And because there was no other option, companies adapted to remote work. In the process, they discovered this trust-based work culture — which, in turn, amplified the use of upgraded technology.</p> <p>④ You tell us — what change did you notice in the digital domain?</p> <p>Comment below.</p> <p>#digitaltransformation #business #innovation</p> <p>#BeyonData</p>
2	How technology reshaped business models	<p>The BIG SWITCH</p> <p>When things are not in our favour, we switch. Natural human nature. That's what 2020 did to us — Revolutionized the world. Accelerated change. Transformed everything. The catalyst to this process was TECHNOLOGY and DIGITIZATION.</p> <p>Work from Home (WFH) reshaped the work culture. And while this was new for many companies, every business eventually adapted to this [new] way of working.</p> <p>Technology has conveniently reshaped its identity as a business addition to a "business enabler". It has helped them by:</p> <ul style="list-style-type: none"> — Making Communication Better: By utilizing connectivity tools [such as Slack, Zoom] and enabling businesses to stay connected. — Providing Cloud Platforms: To share files seamlessly in real-time with Cloud computing being the catalyst. It ensured business continuity, without requiring a physical space for running business. — Harnessing Machine Learning: Businesses deployed solutions that delivered optimization & re-trained their workforce to adjust to the remote work culture and advancements. <p>The world switched with technology — and tech stepped up as never before highlighting the importance of innovation.</p> <p>How has technology helped your business? What strategies did you adopt? Let us know</p> <p>#business #technology</p> <p>#BeyonData</p>
3	Use of AI / Smart tools	<p>"Artificial Intelligence Market Size Worth \$390.9 Billion By 2025." says a study done by Grand View Research.</p> <p>Today, AI is no longer restricted to being just science fiction; rather it has changed the way businesses operate in this technologically evolving world</p> <p>AI helps in enhancing the working of the business procedures. Here are some tools that you can use:</p> <p>Microsoft Azure Cognitive Services IBM Watson Amazon Lex TensorFlow</p> <p>And they come with some amazing benefits to businesses, including:</p> <ul style="list-style-type: none"> — Increase in automation which means lesser physical labour required (or the same people can be engaged to perform other tasks) — Effective management of repetitive, monotonous tasks — Error reduction that ultimately helps in increasing accuracy — Aids in smart decision making for businesses by analysing and predicting trends — Increased efficiency, productivity, and agility <p>Which AI tools do you use for your business? How has your experience been? We'd love to discuss about them</p> <p>#ai #artificialintelligence #automation</p> <p>#BeyonData</p>

POST #	TOPIC	CREATIVE COPY
4	Role of analytics	<p>Google tells "93% of companies changed their marketing investment mix during the pandemic". The reason? ANALYTICS.</p> <p>Analytics, data, statistics — form a crucial part of businesses. Data is the new gold. And with the increase in online activity, time spent by people online saw a 60% increase. This behaviour change led to more data and analytics available — and it became easier for businesses to analyze consumer preferences.</p> <p>Analytics helped businesses in these ways:</p> <ul style="list-style-type: none"> By turning insights into advantages, businesses used data to shape a well-researched growth strategy aligning with consumer interests. Business goal setting is never guesswork. With the right set of insights, businesses assembled this data [based on previous activities and even future predictions] to set the right goals for the company. Analytics helped businesses spot the right trend at the right time to take the right action for the right growth: when it mattered the most. <p>In short, leveraging Data for Decisions was (and remains to be) the best strategy.</p> <p>What do you think? Is your business insights-led?</p> <p>#analytics #statistics #marketing #strategy #business</p> <p>#BeyonData</p>
5	Harnessing Machine Learning	<p>Is your business harnessing Machine Learning? Machine Learning (ML) helps in extracting information from a huge set of raw data.</p> <p>Its success can be analyzed by the progress of major giants like Google, Amazon, Microsoft, Apple, Twitter etc. who are already using these tools to grow exponentially.</p> <p>Here are 4 ways in which machine learning will help your businesses grow too —</p> <ol style="list-style-type: none"> 1. Automate Routine Tasks Routine IT tasks like security monitoring, auditing, and classification or reporting can be automated — that makes management easier and also enables employees to focus on other crucial tasks. 2. Solve Complex Problems ML provides solutions to problems that are difficult for humans (and the chances of errors are nearly zilch too!) 3. Make Valid Predictions With ML, you can easily observe what customers are interested in, and gauge the most important factors that lead to customer churn. 4. Secure your System Large volumes of data need extra security, which engages a large security force. ML can eliminate security concerns, since it can take care of cybersecurity effectively. <p>While machine learning is still in its nascent stage, it is fast gaining ground.</p> <p>Do you think small businesses are going to benefit from this? Comment below</p> <p>#machinelearning #cybersecurity</p> <p>#BeyonData</p>
6	Load on IT infrastructure & how to manage it	<p>Businesses are increasingly relying on technologies and hence, IT infrastructure more than ever — to manage their workforce remotely, drive business operations, or even optimize for maximum efficiency.</p> <p>Naturally, the workload on existing IT infrastructure has increased, which might lead to lag or break down, if not addressed in time.</p> <p>But, fret not. Here are 3 tips to manage your business IT infrastructure —</p> <ol style="list-style-type: none"> 1 Refresh Your Hardware Old machines are not capable of taking in the excess load. They even put your security under stress opening up vulnerabilities (like data breach). So, get new servers! 2 Invest in Futuristic Technology Advanced technologies are updated to match your current and future requirements. Upgrade to reap in the benefits before your competitors to gain an upper hand. 3 Focus on Business Demands Also, don't fall for the fads blindly. Analyse your business requirements deeply and then invest in IT as per your needs. <p>.</p> <p>Some businesses will scale up to face the technological challenges while others will reach out to technology partners and experts who will help create the optimal infrastructure to power on and achieve optimal productivity.</p> <p>At BeyonData, we can help you manage and strengthen your IT backend to suit your business goals. DM us your inquiries</p> <p>#business #BeyonData</p>

7	Cyber threats your business needs to be protected from in 2021	<p>BEWARE: 4 Biggest Cyber Threats in 2021</p> <p>Rapid Digitization does provide speed, stability, and security — but sometimes, that also gives way to new vulnerabilities, attacks, and cyber threats. So, what should we expect in 2021?</p> <p>With 90% increase in cyberattacks in 2020, experts say cybersecurity threats in 2021 will grow uglier; the likes including:</p> <ul style="list-style-type: none"> — Cloud Vulnerability — Data stored on the cloud is a tempting target for hackers. Data breaching, misconfiguration, insecure interfaces are some of the top threats here. — AI-Enhanced Cyberthreats — AI is making a significant impact on business growth. But, cybercriminals are not far behind. They can [mis]use AI to launch malicious software to invade your privacy. — AI Fuzzing — With old fuzzing techniques, AI is used to create tools that detect system vulnerabilities; but hackers could operate it to start, automate, and accelerate malicious attacks. — Machine Learning Poisoning — ML models gather data from crowd-sources or social media; hackers feed ML algorithms false data in an effort to get it to make poor decisions. <p>Want to secure your business against such threats?</p> <p>Stay tuned for the next post. And keep following #beyondata</p> <p>#cybersecurity #cloudsecurity #cyberattack</p>
8	Cybersecurity — Increased threat, Increased security	<p>3 Ways in Which You Can Assess CYBER THREATS</p> <p>Cyber security has become a crucial element to carry out business workflows securely, but a slight meddling with the infrastructure — and the whole system can be put at risk. Do you know... Each year gets worse for cyber attacks across the globe with threats like:</p> <ul style="list-style-type: none"> — Compromising of Private Data — Costly Recovery Expenses — Weakening Client Trust <p>Here, risk assessment can help evaluate and prevent various cyber security threats. You can do that by —</p> <ul style="list-style-type: none"> — Regulating System Testing — Adapt to newer technologies, regularly upgrade your softwares, and conduct vulnerability scans and audits to look for weaknesses in your organisation's IT infrastructure. — Utilizing Employees — Along with relying on technology to perform security functions, train your employees as well about cybersecurity — who can take rational actions as well as care against any potential threats. — Developing Recovery Plan — Have a plan even before the disaster hits. This will provide you with an action plan and allow you to recover faster. <p>At BeyonData, we provide Cybersecurity Consulting and System Security Assessment to identify vulnerabilities and prevent data compromise for your business.</p> <p>Need an assessment? Comment below</p> <p>#cybersecurity #informationsecurity #cyberattack #beyondata</p>
9	Republic Day	<p>India ranks 3rd among the most attractive investment destinations for technology transactions. Amazing, isn't it? Here's mapping India on the technological front</p> <p>The Mars Orbiter Mission made India the only nation in the world to reach Mars in its first attempt.</p> <p>Aadhaar became the largest and most successful IT project ever undertaken in the world.</p> <p>India developed an indigenous supercomputer called PARAM that met high-speed computational needs.</p> <p>Out of the top 20 best Information Technology companies in the world, 4 companies are of Indian origin: TCS, Infosys, Wipro, and HCL technologies.</p> <p>From 2014 - 2020, solar power capacity of India has increased from 2.6 GigaWatts (GW) to 38 GW. Companies like Sukam power systems have electrified schools in Africa to support the education of children.</p> <p>India has built the world's first national digital infrastructure, leaping at least 2 generations of financial technologies; and has the capabilities to emerge as the biggest technologically developed country.</p> <p>Today, on our 72nd Republic Day we would like to pay a small tribute to every Indian who is working hard for making India great in the world technology space worldwide.</p> <p>BeyonData wishes you all a very Happy Republic Day!</p> <p>#republicday #beyondata</p>

10	How Cloud Computing Is Changing The Future Of Business?	<p>"By 2029, cloud computing will become a major driver of revenue growth," says Future Cloud Computing report by Google.</p> <p>Transitioning to a new way of working needs a seamless flow — of data and resources. That's where cloud computing lets businesses focus on performance, with minimal hassle.</p> <p>Here are 4 ways in which cloud computing is changing business:</p> <ol style="list-style-type: none"> ① Enables a Flexible Workplace All the data is stored on the cloud, giving the flexibility to work from anywhere; which is beneficial to employees. ② Provides Security Multiple levels of control in a network infrastructure to afford continuity and protection; added benefits can be attained by partnering with cloud security companies. ③ Sustains Innovation Cloud aids automation that helps drive innovation — and when combined with low-code & no-code apps, it enables a broader range of people to develop new digital services. ④ Serverless Architecture Designed to give developers a quick way to create systems and applications; where the cloud platform determines the amount of infrastructure required and equips it to support the system. <p>Cloud computing has not only transformed, but revolutionized the entire world.</p> <p>What do you think? Comment below</p> <p>#cloudcomputing #cloud #cloudsecurity #beyondata</p>
11	4 Powerful Cloud Computing Platforms:	<p>4 Powerful Cloud Computing Platforms for Businesses</p> <p>With the new wave of remote working, demand patterns of businesses have changed to new and secure technologies — primarily, cloud computing to ensure availability, scalability, and profitability.</p> <p>Here are 4 Cloud Computing platforms your business needs:</p> <ul style="list-style-type: none"> — Oracle Cloud A set of branded SaaS, PaaS, DaaS, and IaaS offerings, it is used to build, redistribute, integrate, and expand Oracle applications and database technology in the cloud. — Amazon Web Services Offering IaaS & PaaS solutions; provide users with server, networking, storage, remote computing, email, and security solutions. — Microsoft Azure Provides a range of cloud services, including analytics, storage and networking. Users can pick and choose from the services to develop and scale new applications. — CloudHub An iPaaS where you can deploy sophisticated cross-cloud integration applications in the cloud, create new APIs on top of existing data sources, and integrate on-premises applications with cloud services. <p>Businesses ranging from startups to MNCs have adopted cloud computing tools to launch their applications and automate business operations.</p> <p>Which platform do you think is efficient for your business and why?</p> <p>Tell us</p> <p>#cloudcomputing #oracle #beyondata</p>
12	5 Tips for Successful ERP Implementation	<p>To stay at the top of the business, an effective Enterprise Resource Planning (ERP) system is more of a necessity. Implementing your first ERP software system can be challenging.</p> <p>Here are 5 tips for an effective ERP implementation —</p> <ol style="list-style-type: none"> 1. Right Pre-Implementation Choices — Ensure the ERP software solution you choose meets your business objectives. Provide detailed functional and technical requirements. 2. Build a Cross-Functional Team — ERP system is an organization-wide solution and used by various departments; the team should be cross-functional (from highly-skilled IT personnel to active daily users). 3. Manage Change, Avoid Chaos — Conduct sessions with staff regularly to manage operations and to ensure orderly implementation. 4. Plan Precisely — To keep the implementation on track, within scope and budget, the team should establish a project plan based on measurable goals and objectives. 5. Get Support — Ask for help when required. Software vendors include support and helpdesk services as part of their ERP solution and can guide you in the right direction. <p>Are you thinking of employing ERP? How do you think it can benefit your business?</p> <p>Comment below</p> <p>#business #beyondata #erp #erp #erp</p>

1	6 Attributes of Effective ERP Strategy	<p>Building an ERP strategy? — Before you do, acknowledge these 6 attributes to craft an effective strategy:</p> <ol style="list-style-type: none"> ① Define Objective Your ERP strategy will be futile if there are no defined goals that your company wants to achieve. Setting goals helps in easy planning and implementation of ERP. ② Set a Budget Before anything, reserve funds to support the implementation, including a contingency budget; since it is common for an implementation to exceed initial budgets. ③ Identify and Address IT Issues Your current IT infrastructure system would not be capable of handling the ERP upgrade, so, consider upgrading the hardware as well. ④ Conduct a Risk Assessment Identify areas where issues might occur, and address them before the installation begins. Be proactive, not reactive. ⑤ Outline an ERP Roadmap Define objectives, responsibilities, roles, and resources before committing to the vendor; basically, have a roadmap to ensure a smooth implementation. ⑥ Get a Good Support BeyonData's ERP Services are designed to support your company's business processes and optimize it for maximum functionality and return on investment(ROI). <p>Wanna know what strategies you can use for an ERP implementation? Comment below</p> <p>#erp #business #beyondata</p>
2	How to get Odoo Certification?	<p>Struggling to get your Odoo certification? We have got you covered — Here's what you can do to get certified:</p> <ol style="list-style-type: none"> ① Preparation — Take in-depth knowledge esp. on "Odoo 14 Functional Content". Leverage e-learning study material on various platforms. — Scale up with "Odoo Scale-up" before the exam. Having some practical Odoo work experience always helps! ② Know the Exam Format — 1-hour online exam with 80 randomized questions. Free retakes are not allowed. You can take the exam anytime. — Secure the Odoo certificate by scoring a minimum 70%. ③ Certification — Candidates can download their Odoo certificates immediately after passing. And use "Certified Odoo Professional" as designation. — Odoo Partners who meet the requirements will be mentioned as Certified Odoo Partners on their website too. <p>Odoo is an open-source ERP software that takes care of all your critical business operations like CRM, Inventory Management, accounting, eCommerce etc.</p> <p>The certification makes sure that the candidate has required know-how of the platform, and tailor best practices for organizations.</p> <p>Still doubtful? Tell us why and we will help</p> <p>#beyondata #business #odoo</p>
3	3 Industries Making Tech A Priority	<p>3 Industries that are Transformed by Technology</p> <ol style="list-style-type: none"> 1. Healthcare — From hospital administrative processes to research or retaining Electronic Medical Record (EMR) Database, tech is taking over: to improve efficiency, automate processes, leverage data, and be upgraded to latest regulatory reforms. — "BeyondHMS" offers a holistic hospital management system with all-round solutions for healthcare institutions. 2. Education — To centralize operations, manage faculty, or even enhance distance education experience, tech has been a game-changer. — Digital solutions can be used to automate salary, manage performance, regulate curriculum, manage student and faculty lifecycle and provide online portals. — "BeyondJMS" offers a complete IT solutions system for managing universities as well as educational institutions. 3. Finance & Banking — Tech enables Digital Audit Management Software, asset and risk management, equity & venture capital solutions for this sector. — "BeyondAudit" by BeyonData offers digital audit management systems to banks and other financial companies to digitize and automate the way they work. <p>With an extensive IT-solutions strategy and an action-oriented approach, BeyonData can help your business to optimize and strengthen your operations.</p> <p>DM for inquiries</p> <p>#healthcareresolution #bankingtech #edutech #beyondata</p>

7	4 Factors to Consider While Choosing Cloud Partner	<p>Cloud computing is limitless — and it's time businesses have utilized its fullest potential . Migrating the business process to the cloud needs thorough research, and choosing the right cloud partner is one of the most crucial aspects.</p> <p>Here are 4 factors to consider before choosing a cloud partner:</p> <ol style="list-style-type: none"> ① Security The partner should ensure security at all 3 steps – host, network, and the physical setup. It is important to ask detailed, explicit questions that concern you before proceeding. ② Compliance Choose a cloud platform that can help you meet compliance standards which apply directly/indirectly to your industry and organization at large. The right partner can help you achieve compliance with minimal costs. ③ Costs Lower prices doesn't mean cheap quality and expensive doesn't always mean great. Best practice — compare them all. See which one completes your business requirements, and then move ahead :) ④ Expertise Cloud partner experts' involvement makes it easier for your business to set up and understand the process. Ask questions upfront about what level of support you will receive. <p>Choosing the right cloud provider is not an extra expense — it is an absolute necessity for your business. The right cloud partner rather helps save investment and ensures hassle-free migration as well as smoother operations.</p> <p>Do you need support in choosing the right cloud platform for your business? Comment below, and we'll sort it out for you</p> <p>#cloudcomputing #cloud #business #technology #beyondata</p>
8	5 Reasons To Choose Odoo ERP for Businesses	<p>Human Resource Management, CRM, Accounting, Inventory, Productivity — every company needs to manage these aspects to run their businesses efficiently. Ease your business operations with open-source ERP software.</p> <p>And it's the age of technology. In comes *Odoo ERP*</p> <p>...With ALL the functionalities required to run and manage any business, integrate different modules into a single system, and ease operations.</p> <p>Still need a reason to transition to Odoo? We'll give you 4:</p> <ol style="list-style-type: none"> ① Fully Web-based — Accessible via web browsers and provides multi-user management support without any disturbance. ② Community Edition — Open Source. No licensing fee is required; but installation, customization, integration, and implementation fee need to be paid to an expert partner. ③ Easy Customization — Tailor-made software solution that will best suit your business requirements. You can choose the features that need to be added for a personal experience. ④ No-Vendor Lock-In — There are no specific groups of people, developers, or technicians that control the developments of Odoo; With strong community support, the businesses can enjoy no lock-ins by the vendor. <p>Are you ready to transform your business? BeyonData can help!</p> <p>[Afterall, we are certified Odoo partners.]</p> <p>Comment "Odoo-powered" and we'll get back to you</p> <p>#erp #odoo #odooreadypartner #beyondata</p>
9	4 reasons Your Business Needs Compliance Management	<p>"80% of the companies that move to cloud witness major improvements in their IT operations within 6 months." — Cloud tech is everywhere!</p> <p>And if you are thinking about moving your business to cloud, here's why Oracle Cloud might be the best bet —</p> <p>Optimize Performance & Reduced Costs Oracle cloud offers industry best IOPS rates, isolated networks thus fast, non-blocking and predictable performance. With minimal efforts required, the cost and time to migrate reduces.</p> <p>World-Class Security and Availability Oracle Cloud offers comprehensive security across all deployments along with governance, visibility and transparency. Availability domains and three separate fault domains per DC ensures application availability.</p>
10	5 Reasons To Adapt Oracle Cloud	<p>Delivers Second-gen Cloud The nextgen Oracle infrastructure i.e. network, storage, database and applications have been engineered to leverage improved automation and built-in security.</p> <p>Only Platform with IaaS, PaaS & SaaS Oracle Cloud Infrastructure is the only cloud service to have all 3 offerings i.e. IaaS, PaaS and SaaS. 11	How Efficient Data Management Can Help Business Succeed	<p>"Data is the new gold, oil, resource." — We all have heard this multiple times. But, without knowing how to manage data, it cannot be leveraged.</p> <p>Today, Data is the foundation of any business' information, knowledge, and ultimately the wisdom for correct decisions and actions. Here are 4 reasons why effective data management is the key to business success:</p> <ul style="list-style-type: none"> Aids in Better Decision Making Data managed well makes analysis easy for the organization that ultimately helps in making accurate predictions and informed decisions for business growth. Cost & Time Efficient Storing and making data easily referable ensures employees never conduct the same research or analysis again and again — and hence, reducing the time and cost of fixing the duplication. Retrievable Data Sources A fail-proof plan for data will ensure that important information is backed up and retrievable from a secondary source if the primary source is ever inaccessible. Reduces Security Risks A strong data management system would reduce any risks associated with potential risk factors like data breaches, and consequent losses. <p>Data is your company's most valuable asset. And it needs to be managed well.</p> <p>What do you think? Are you managing your data? Comment below</p> <p>#datamanagement #data #business #beyondata</p>
12	Still Suffering From SAP? Think Odoo.	<p>Still suffering from SAP? Think Odoo!</p> <p>Choosing an ERP that is a solid match for your business is a major business decision. And your choices can strongly affect your business' future development and benefit.</p> <p>For the longest time SAP was dominating the ERP software product market. But, with the advent of Odoo, this notion got challenged and changed. Here's how:</p> <ul style="list-style-type: none"> Functionalities Odoo provides infinite opportunities to developers to customize the software according to the requirement where SAP can be customized only by its consultants upto a limited extent. Cost-Effective Being an open-source software, implementation and maintenance costs are relatively lower while for SAP the cost of software and maintenance is high. Professional Support For Odoo, there is no shortage of techno-functional consultants. SAP provides engineers and counsels too, but the cost is somewhat higher for the service. <p>Odoo offers the much needed flexibility and potential to all kinds of enterprises plus it is built on a new age platform.</p> <p>Moving to a new ERP isn't an easy decision; it requires a lot of research — let us help you with it. Tell us where you are stuck and we will figure it out together.</p> <p>Comment below</p> <p>#erp #sap #odoo #business #beyondata</p>

LinkedIn 4	Self transformation for leadership	<p>Sadhguru — "Transformation & leadership cannot be separated, as every action of a leader has the power to directly or indirectly transform the lives of many people."</p> <p>So, a leader must always be conscious of the impact of his actions. Thus, comes in: SELF TRANSFORMATION — the most crucial aspect for a leader</p> <p>See, leaders do not (and cannot) necessarily know everything. No one can.</p> <p>But, here's what sets them apart:</p> <ul style="list-style-type: none"> — the quality to see things differently and EXECUTE them. — being aware of and in control of your thinking, actions, decisions – and its impact. — the ability to take risks, yes. But more than that, the courage to accept your failures, learn from them, and change your actions. <p>.</p> <p>Being a leader myself, I believe true leadership is not just about making an impact on others. In this journey of becoming a leader, you are then constantly striving to transform yourself first.</p> <p>Because, when you transform yourself as a leader, you also transform all the lives that are connected with you</p> <p>Thoughts?</p> <p>#leadership #leadershipdevelopment #sadhguru #life #beyonddata</p>
LinkedIn 5	3 ways technology enhances University operations	<p>Education & Technology: An Overview</p> <p>Here is how technology has enhanced the life cycles of Students, Faculty, & Course Management in Education sector:</p> <ul style="list-style-type: none"> Students — Technology-enabled education has allowed students to learn from anywhere at any time, engaging them in a more interactive & effective way of gaining knowledge. Faculty — Different online resources help in enhancing traditional teaching methods (like planning of virtual lessons, grading softwares, online assessments & online submissions) that help in saving time and manual efforts. Courses — Managing the curriculum through online portals and dashboards has made it easier for faculty operations and administration by keeping everything under one roof (even during the pandemic). Administration — Managing human capital, hostels, feedback, grievance, planning, budgeting, sales, purchase, inventory, finance. Everything is flawlessly integrated to ensure one platform is good for all the departments. <p>With changing times, the education system has accustomed itself to the needs of administration, students, & teachers by revolutionary technology.</p> <p>At BeyonData, we offer a comprehensive and holistic system for educational institutions and universities to integrate & centralize operations for better management.</p> <p>Comment 'BeyondUMS' & we'll provide details about best solution for Managing University operations</p> <p>#business #educationmanagement #innovation #education #beyonddata</p>
LinkedIn 6	How Odoo CRM helps your business increase sales	<p>Does your business have a CRM software? — Yes?! But, is your CRM software effective? Well, Odoo CRM is effective enough. Here's how it can help your business —</p> <ul style="list-style-type: none"> Lead Generation — Helps in maintaining leads from opportunities, keeps the record of actual customers & prospects separately, avoiding lengthy sales pipeline. Tracking of Leads — Helps in tracking the number of sales different marketing teams have made helping in analysing, following up on the number of sales achieved through different marketing channels. Improved Analytical Data and Reporting — By storing all the data in a single place helps better in analysis & better reporting helps in making resourceful and effective decisions to reap the rewards in customer loyalty and long-run profitability. Integrations — Various integrations like Office365, Gsuite, Calendars, Sales, Purchase, Accounts etc. make the entire solution much more effective as all the relevant information is available on one platform. <p>.</p> <p>Why is an effective CRM so important? Because:</p> <p>A great CRM software enables great relationships with your customers, enhancing relationships with existing clients, finding new potential customers and thus, increasing sales.</p> <p>So, do you want to take up new customers with Odoo CRM?</p> <p>Comment 'Yes!' & let's discuss how we can make it happen</p> <p>#odoo #crm #crmsolutions #beyonddata</p>

LinkedIn 7	Roger Bannister (Athlete - 4 minute mile)	<p>Do you know about Roger Bannister? The 4-minute mile man!</p> <p>Many athletes came. They tried. They failed. They went. — Because running a mile in less than 4 minutes was an impossibility physically.</p> <p>But... Here was this young man.</p> <p>It was May 6, 1954.</p> <p>Roger Bannister, 25, participated in an annual run between the Amateur Athletic Association and Oxford University. 1200 people sitting there witnessed history as Bannister ran a mile in just 3 minutes 59.4 seconds (to be precise!)</p> <p>A seminal moment in the history of sports.</p> <p>— But how did he do it?</p> <p>Bannister had been training seriously for 6 months and running 28 training miles a week religiously.</p> <p>He was consistent and persistent. He strived to beat his personal record with tough discipline and practice. He believed that it was possible. So, he could do it.</p> <p>What the world witnessed as a 4-minute miracle was the culmination of putting in sweat everyday with a belief in oneself. With this benchmark set, 10 more athletes could do it in subsequent years. The world realised the limitation of mental barriers.</p> <p>And that's what we can take away from this.</p> <p>To succeed in life, what you need is...</p> <ul style="list-style-type: none"> Practice & Persistence Discipline & Dedication Courage & Consistency <p>What's your take on the ingredients of success? Tell us in the comments</p> <p>#running #life #motivation #beyonddata</p>
LinkedIn 8	Karoly Takacs (Shooter - Olympic)	<p>Personality of the Day: Karoly Takacs — Olympic Gold-medalist Pistol shooter — with just one hand!</p> <p>Here's a story about making the odds work for you, and giving it back to life!</p> <p>.</p> <p>Takacs was part of the Hungarian army and a world-class shooter.</p> <p>1940. He was to make his first appearance as the pistol shooter in the Tokyo Olympics. But, with just a few months to go for the games, everything changed for him.</p> <p>While serving in the army, a defective grenade exploded in his right hand [his dominant shooting hand] & shattered it completely.</p> <p>On life's crossroads, he was left with choices — To give up and life to take over. Or... ... To stand-up once again and give it back to life.</p> <p>He chose the latter.</p> <p>And while he was undergoing treatment, Takacs started training his left hand to shoot.</p> <p>.</p> <p>Instead of focusing on what he didn't have or what he had lost, he decided to focus on making the best of what he had — and make it work for him.</p> <p>Situation could have broken him forever. But, he braved it. With his MINDSET.</p> <p>1948. Takacs came back up, participated in the London Summer Olympics. And won the first of many gold medals.</p> <p>Losers find excuses. Winners find solutions.</p> <p>What's your take on this? Give Up or Fight Back. Comment</p> <p>#motivation #life #leadership #beyonddata</p>
